

The perfect compliment to
your Naked Freshwater System.

NKD-pH Controller

Keeping your pool's pH balanced is now even easier with the NKD-pH Controller.

Simply plug in to the NKD-R or NKD-M system and the doser is automatically configured to the pool.

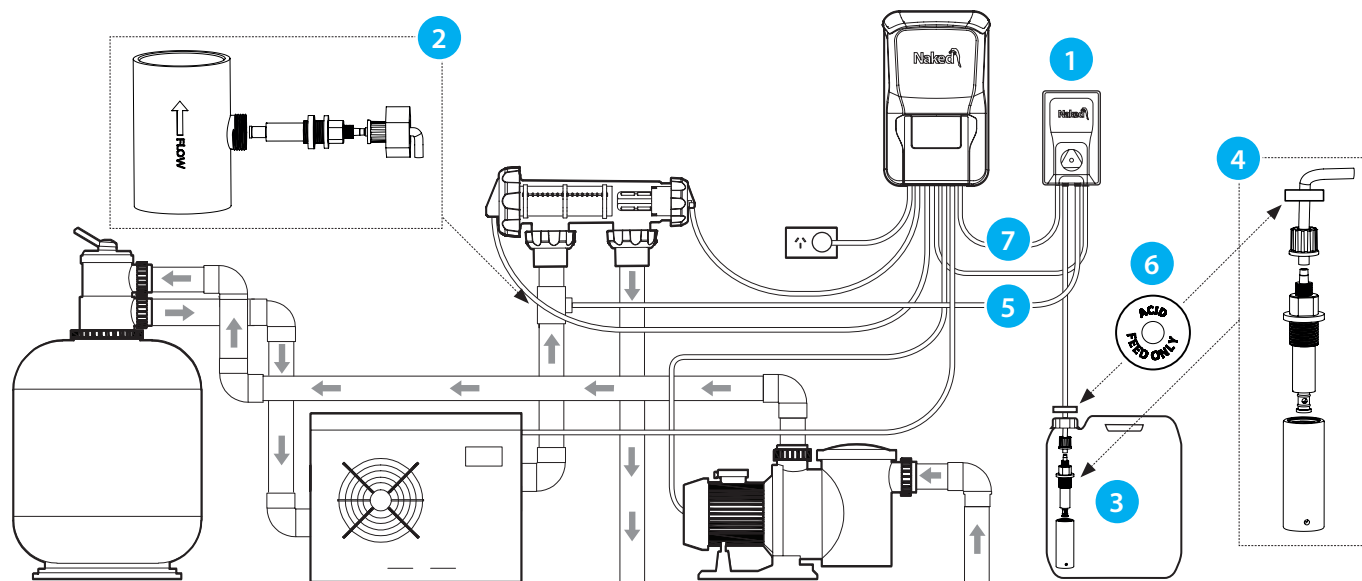

The perfect compliment to the Naked Freshwater System.

The NKD-pH Controller, when paired with your Naked Freshwater System, automatically helps maintain the pool's pH levels by adding diluted acid daily, eliminating the need for manual adjustments. This ensures optimal water quality, enhancing the effectiveness of the sanitisation process

and protecting the pool's surface. It is particularly beneficial for freshwater pools with low chemical use. The system simplifies pool maintenance, saves time, and ensures a consistently balanced pH, resulting in crystal-clear water that is gentle on the skin and environmentally friendly.

Typical equipment installation

- 1 NKD-pH Controller
- 2 Clear Injection Tee Piece
- 3 Acid Drum
- 4 Weighted Suction Valve
- 5 Clear PVC Flexible Tube
- 6 Acid Drum Label
- 7 Data Cable

SPECIFICATIONS

Volts Input (Vac)	220-245
Amps Input - Max. (Aac)	1.00
Total Power Consumption (W)	13W Motor - 20W Total
Frequency (Hz)	50
pH Controller Dimensions (mm)	135W x 225H x 123D
Output Controlled by Sanitiser (LPH)	0 - 1.0
Rated Pressure (kPa)	350
Squeeze Tube	Tygon® Norprene® (Commercial spec)
Motor Speed (RPM)	10
Non-Return Injector Valve	PVC with viton sleeve
Tubing	6m x 6mm Clear PVC Flexible Tube
Roller Block	Heavy-duty PVC
Power Cord	Approved piggy-back type
Water Connection	40/50mm
Water Flow Rate (L/min)	80-650
IP Rating	34
Net Weight (kg)	2.5
